

data.aws_ami.ubuntu

aws_key_pair.key-tf

aws_security_group.allow_tls

aws_instance.terraform-ec2

```
graph LR; A[aws_instance.terraform-ec2] --> B[data.aws_ami.ubuntu]; A --> C[aws_key_pair.key-tf]; A --> D[aws_security_group.allow_tls];
```

The diagram illustrates the dependencies of the `aws_instance.terraform-ec2` resource. It is shown as a central box on the right, with three arrows pointing from it to three other boxes on the left: `data.aws_ami.ubuntu`, `aws_key_pair.key-tf`, and `aws_security_group.allow_tls`. This indicates that the EC2 instance resource depends on these three other resources for its configuration.
